Results

Your test results indicate the following:

- Color Vision: [Normal / Color Vision Deficiency Detected]
- Type of Deficiency (if applicable): [Deuteranopia / Protanopia / Tritanopia]
- Severity: [Mild / Moderate / Severe]

Your color vision was tested across multiple patterns designed to detect the most common forms of color blindness. Based on your performance, [no color vision issues were detected / a color vision deficiency was identified].

Export Test Report

Note: This test is not a clinical diagnosis but an indicator of potential color vision deficiencies. For a comprehensive assessment, please visit an optometrist.
