

Project Documentation: Checkpoint 3 - Basic Functionality

Remaining Work for "Beta" Phase

Revamped UI:

Implement a modernized and intuitive UI to enhance user engagement and accessibility.

Expanded Test Suite:

Introduce additional color vision tests to provide comprehensive color blindness analysis.

Detailed Report System:

Provide users with detailed reports on their color blindness type, with educational insights.

Educational Resources:

Integrate expanded educational resources on color blindness management and daily life adaptation tips.

Performance and Optimization:

Ensure smooth navigation and low-latency responses.

Optimize app performance for lower-end devices.
